

# Making IT work for You!

My name is Grant Watt and I have been helping home users and small businesses in the northern suburbs with their computer issues for the last 10 years.

With a BSc(Hons) degree, a post graduate diploma in Computer Science and 15 years prior software development experience, I can fix the most complex problems.

It's all about listening to people, solving their problems and leaving them happy with the job done.

Technology today is varied, and solutions vary for each customer. Some need a very simple set-up with no frills at all – others don't really know what they want, so I listen carefully to their needs, then offer the right solution for them, explained in a way that makes sense.

It's not just computers either – many people want to set up smart TVs, phones, tablets, emails or backup important documents and photos.

I also custom build new desktops tailored to your exact needs, using the highest quality components. Data transfer and 2½ hours setup time at your home or business is included!

Please visit my website and check out the tech reviews and newsletters section for further information.

- Police Clearance
- Mobile 7 Day Service
- Malware/Virus removal
- Installations & Upgrades
- Network/Internet/NBN Setup
- Data Recovery
- EFTPOS/Credit Cards
